

Escape-Mattress Compact

Best choice for healthcare environment and public buildings

What's an Escape Mattress?

Escape-Mattress models are designed for individuals who would not be able to comfortably get into an evacuation chair, or where evacuation chairs may struggle (for example when evacuating an individual down a spiral staircase). Evacuation mattresses are ideal for medical centres and hospitals, as they cater for complex healthcare needs. E.g. bed-bound and unconscious patients. **The Escape-Mattress** is an "A-label quality" product and produced in-house.

Our mattresses are CE certified & TÜV certified up to 150kg. We guarantee the highest quality standards.

The **Escape-Mattress Compact** is a complete **Escape-Mattress** but its smaller dimensions allows it to be used more flexibly. The **Escape-Mattress Compact** is rolled up and stored in the storage bag that is included. This **Escape-Mattress Compact** is more suitable, so that it can be taken to different situations where an evacuation aid is required.

The **Escape-Mattress** is made of fire resistant material that is resistant to blood, urine, acids and alkaline as well.

CE certified and TÜV tested and certified for 150kg payload.

There is no better and more durable quality available on the market than any of our **Escape-Mattress** range.

Advantages of the EscapeMattress Compact:

- Stored double-folded (space saving)
- 4 carrying handles on each side

Protection of evacuee/patient:

- 2 body flaps – 1 per side
- Foot bag
- Headrest
