

Escape-Mattress Solo

Best choice for healthcare environment and public buildings

What's an Escape Mattress?

Escape-Mattress models are designed for individuals who would not be able to comfortably get into an evacuation chair, or where evacuation chairs may struggle (for example when evacuating an individual down a spiral staircase). Evacuation mattresses are ideal for medical centres and hospitals, as they cater for complex healthcare needs. E.g. bed-bound and unconscious patients. **The Escape-Mattress** is an "A-label quality" product and produced in-house.

Our mattresses are CE certified & TÜV certified up to 150kg. We guarantee the highest quality standards.

The **Escape-Mattress Solo** is fastened to the wall. By opening the zip at the underside of the cover, the **Escape-Mattress Solo** slides out and is ready to use. Suitable for places where there is limited space, such as operating theatres.

The **Escape-Mattress** is made of fire resistant material that is resistant to blood, urine, acids and alkaline as well.

CE certified and TÜV tested and certified for 150kg payload.

There is no better and more durable quality available on the market than any of our **Escape-Mattress** range.

Advantages Escape Mattress Solo:
